3621

DATE MAILED: 09/16/2005

Please find below and/or attached an Office communication concerning this application or proceeding.

Office Action Summary

Application No.

09/966,223

Applicant(s)

KARGMAN, JAMES B.

Examiner

FIRMN BACKER

Art Unit

3621

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 28 June 2005.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-39 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-39 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
 2. ☐ Certified copies of the priority documents have been received in Application No. _____.
 3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

Response to Arguments

1. Applicant's arguments with respect to claims 1-39 have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1-39 are rejected under 35 U.S.C. 102(e) as being anticipated by Movalli et al (U.S. PG Pub No. 2005/0004876 A1).
4. As per claim 1, 18, Movalli et al teach a method of electronically executing a commercial transaction between a customer and a vendor, the method comprising transmitting electronically a transaction code from the customer to an electronic order processing system associated with the vendor; receiving the transaction code by the order processing system associated with the vendor; identifying the user based upon the contents of the transaction code; authenticating the transaction code; identifying a commercial transaction associated with the transaction code; and executing the identified commercial transaction (*see figs 4, 5, paragraphs 0046-0051*).

5. As per claim 2, 20, Movalli et al teach a method where the transaction code is comprised of a telephone dialing sequence, and applying the transaction code dial sequence to a line associated with a public switched telephone network (*see figs 1*).

6. As per claim 3, 21, Movalli et al teach a method in which the transaction code is comprised of a Universal Resource Locator, and the transaction code is transmitted via the Internet (*see fig 1, 2, 3*).

7. As per claim 4, 19 Movalli et al teach a method of transmitting a transaction code that has been previously stored within digital memory associated with a wireless telephone via a wireless communications network (*see fig 1*).

8. As per claim 5, Movalli et al teach a method of identifying the contents of a user identification data field within the transaction code; locating the user identification data field contents within a database accessible by the order processing system (*see paragraphs 0046-0051*).

9. As per claim 6, Movalli et al teach a method of identifying the contents of a security code field within the transaction code; determining that the received transaction code is authentic when the contents of the security code field correspond to a previously-configured security code associated with the contents of the user identification data field, which previously-configured

Art Unit: 3621

security code is stored within a database accessible by the order processing system (*see paragraphs 0046-0051*).

10. As per claim 7, Movalli et al teach a method of identifying a decryption key associated with the contents of the user identification data field; decrypting at least a portion of the transaction code using the identified decryption key; determining whether the decrypted portion of the transaction code is valid (*see paragraphs 0046-0051*).

11. As per claim 8, Movalli et al teach a method of identifying a decryption key based upon the identity of the user; decrypting at least a portion of the transaction code using the decryption key (*see paragraphs 0054*).

12. As per claim 9, Movalli et al teach a method of determining the contents of a transaction identification field within the transaction code; locating the contents of the transaction identification field within a database accessible by the order processing system; identifying the nature of the commercial transaction based upon information within the database associated with the contents of the transaction identification field (*see paragraphs 0046-0051*).

13. As per claim 10, Movalli et al teach a method of determining the contents of a transaction identification field within the transaction code; identifying the nature of the commercial transaction based upon information within the transaction identification field (*see paragraphs 0046-0051*).

14. As per claim 11, Movalli et al teach a method of locating a record within a database associated with the order processing system based upon the identity of the user; retrieving details of the commercial transaction from the database record associated with the user (*see paragraphs 0046-0051*).

15. As per claim 12, Movalli et al teach a method maintained within a point of sale computer system operated by the vendor (*see fig 1, 2*).

16. As per claim 13, Movalli et al teach a method of entering the identified commercial transaction into a point of sale computer system operated by the vendor (*see fig 1*).

17. As per claim 14, Movalli et al teach a method of electronically executing a commercial transaction between a customer and a vendor, the method comprising dialing a transaction code comprised of a telephone dial sequence onto a telephone network directed to an order processing system associated with the vendor; receiving a telephone call by the order processing system as a result of the dialing of the transaction code; detecting caller identification information received by the order processing system from the telephone network in conjunction with the telephone call; detecting at least a portion of the transaction code dial sequence by the order processing system associated with the vendor; identifying the user based upon the caller identification information received by the order processing system; identifying a commercial transaction

Art Unit: 3621

associated with the transaction code; and executing the identified commercial transaction (*see figs 4, 5, paragraphs 0046-0051*).

18. As per claim 15, Movalli et al teach a method identifying a record in a database associated with the order processing system based upon the received caller identification information; retrieving details of the commercial transaction from the database record associated with the received caller identification information (*see figs 1*).

19. As per claim 16, Movalli et al teach a method of authenticating the user before executing the identified commercial transaction (*see figs 4, 5, paragraphs 0046-0051*).

20. As per claim 17, Movalli et al teach a method prompting the user to enter a passcode; determining that the passcode entered corresponds to a passcode value previously stored within a database record associated with the caller identification information (*see figs 4, 5, paragraphs 0046-0051*).

21. As per claim 22, Movalli et al teach a method conveyed to the electronic device via wireless messaging (*see fig 1, 2, 3*).

22. As per claim 23, Movalli et al teach a method identifying wireless message as a transaction code capable of storage within the user device; programming the transaction code

Art Unit: 3621

into digital memory within the user device without requiring substantial intervention by the user (*see figs 4, 5, paragraphs 0046-0051*).

23. As per claim 24, Movalli et al teach a method where the transaction code is generated by a point of sale system associated with the vendor in response to a request by the customer (*see figs 1*).

24. As per claim 25, Movalli et al teach a method for the dissemination of information to a mobile electronic user device based upon the device location, for the facilitation of a commercial transaction between a customer and a vendor, the method comprising the steps of: identifying the location of the user device; determining that the location of the user device conforms to a predetermined location criterion for receipt of a message; conveying the message to the user device electronically (*see figs 4, 5, paragraphs 0046-0051*).

25. As per claim 26, Movalli et al teach a method in which the message is a transaction code which can be stored within the user device and subsequently transmitted by the user device to initiate a commercial transaction (*see fig 1, 2, 3*).

26. As per claim 27, Movalli et al teach a method of determining that the location of the user device conforms to a predetermined criterion for receipt of a message is comprised of the step of determining that the location of the user device lies within a predetermined geographical region associated with the vendor (*see figs 4, 5, paragraphs 0046-0051*).

Art Unit: 3621

27. As per claim 28, Movalli et al teach a method in which the user device is a cellular telephone, and the step of identifying the location of the user device is performed via triangulation techniques implemented by the communications infrastructure with which the cellular telephone operates (*see figs 4, 5, paragraphs 0046-0051*).

28. As per claim 29, Movalli et al teach a method in which the user device includes a global positioning system receiver, and the step of identifying the location of the user device is performed by receiving location information provided by the global positioning system receiver (*see fig 1, 2*).

29. As per claim 30, Movalli et al teach a method of determining that the message satisfies one or more filter criteria preconfigured by the customer (*see fig 1, 2*).

30. As per claim 31, Movalli et al teach a method which the filter criteria are satisfied when one or more of the following message attributes conform to predetermined user preferences: the identity of the vendor; the geographical location of the vendor; the zip code in which the vendor is located; the city in which the vendor is located; the nature of the business conducted by the vendor; the frequency with which the customer enters the area in which the vendor does business; and the frequency with which the customer receives messages from the vendor (*see figs 4, 5, paragraphs 0046-0051*).

Art Unit: 3621

31. As per claim 32, Movalli et al teach a method of automatically deleting the transaction code from the user device upon the satisfaction of a deletion criterion (*see figs 4, 5, paragraphs 0046-0051*).

32. As per claim 33, Movalli et al teach a method which the deletion criterion is the expiration of a predetermined period of time since the transaction code was stored within the user device (*see figs 1*).

33. As per claim 34, Movalli et al teach a method which the deletion criterion is the transmission of the transaction code by the user device (*see fig 1, 2, 3*).

34. As per claim 35, Movalli et al teach a method which the deletion criterion is the transportation of the user device a predetermined distance from a location associated with the vendor (*see fig 1, 2, 3*).

35. As per claim 36, Movalli et al teach a method comprised of map information identifying the location of the user device and a location associated with the vendor (*see figs 4, 5, paragraphs 0046-0051*).

36. As per claim 37, Movalli et al teach a method of dissemination of information to a mobile electronic user device based upon the device location, for the facilitation of a commercial transaction between a customer and a vendor, the method comprising the steps of: identifying the

Art Unit: 3621

current location of the user device; identifying the direction and rate at which the user device is moving; determining that the location, direction of travel and rate of travel of the user device conform to one or more predetermined criterion for receipt of a message; conveying the message to the user device electronically (*see figs 4, 5, paragraphs 0046-0051*).

37. As per claim 38, Movalli et al teach a method of determining the anticipated location of the user device at a predetermined time in the future based upon the current location, rate of travel and direction of travel; determining that the anticipated location of the user lies within a predetermined region associated with the vendor (*see figs 4, 5, paragraphs 0046-0051*).

38. As per claim 39, Movalli et al teach a method of calculating a radius of accessibility for the customer operating the user device as an estimate of the geographical region over which the customer would travel to engage in a commercial transaction, which calculation is based upon the location, rate of travel and direction of travel of the user device; determining that a location associated with the vendor lies within the radius of accessibility (*see figs 4, 5, paragraphs 0046-0051*).

Conclusion

39. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. (*see form 892*).
